Phone: 888-MYTREXLER

Sales Center Hours: Fri - Tues, Noon - 5pm

Featuring Twin Villas Upper Macungie Township - Priced from \$239,500

Trexler Field - Kay Builders recently received final approvals for this scenic new community of twin villas and single homes and ground breaking is planned for late 2009. The community is situated on 230 acres of rolling hills; of which 124 acres have been dedicated as a conservation area. Along with beautiful views of nearby South Mountain and the meandering Schaeffer Run stream, this community will have many recreational features. A one and a half mile walking path winds through wooded areas near the stream and will be accentuated by our planned butterfly preserve.

The community is well located in the Parkland School District in a rural setting close to all amenities and major highways. Please visit our "Contact Kay" page and fill out the information on the contact form to be placed on the priority list for pre-construction pricing. We appreciate your continued interest and will keep you updated periodically!

The Highlands at Trexler Field is the first of three distinct sections of Trexler Field. These 242 twin villas will be situated at the apex of the community and will have beautiful southern views of nearby south mountain. The peaceful Schaeffer Run stream wanders through the valley separating the Highlands into its own unique community. We invite you to explore our twelve floor plans ranging in size from 1900-2500 sq. feet and a variety of designs, including master on the main, traditional and open floor plans.

The Glen at Trexler Field, which is tucked away in the private wooded area of the community, will feature a variety of luxurious floor plans with all the amenities. 40 twin villas are planned for this phase of the community.

The Reserve at Trexler Field is the single home area of the community and will feature 76 spacious home sites directly adjacent to the preserved conservation area. Kay Builders will offer many of the current single home floor plans which have proven to be our most popular designs complemented by many new upscale designs. Homes will range in size from 2300-3300 sq. feet. Between our innovative design and our desire to customize plans to your liking, you are sure to find a home that meets your needs.
