Square Footage: 2616

The 2-story columned foyer provides a glamorous entry view of formal spaces while the open concept kitchen and family rooms span the rear of the home. And a conveniently positioned stairway makes the formal area easily adaptable for more casual family activities.

On the 2nd floor, a luxurious master suite features special ceiling options, a private retreat, 2 large walk-in closets and a salon bath, which includes double bowl vanity, privacy toilet and volume ceiling. The 3 additional bedrooms and hall bath also are positioned with flexibility in mind with the opportunity to convert one to a study overlooking the foyer. The many customized variations of the Bancroft make it one of our most popular designs.
