SIERRA

Square Footage: 2,377

1st Floor

...An entry foyer, with dining room left, speaks of tradition while other areas reflect today's open, contemporary lifestyle. The cabinet filled kitchen pantry, optional technology center, island/optional snack counter, spacious breakfast nook and 2-story family room span an entire 39 foot width while flex space, suitable as a study or media room, satisfies your quiet time needs.

2nd Floor

A traditional/contemporary blend carries through at the upper level where the master suite with multiple closets and luxury bath is positioned for privacy. The 2nd floor laundry and spacious loft make this area a homemaker's dream—view TV during laundry; put away clothes nearby; relax when chores are done—a great space! Two additional bedrooms, hall bath and easy to envision 4th bedroom option complete the ultimately livable Sierra.
